

# How to Prepare YOUR PUP FOR THE PARK

## VACCINATE

Before your dog socializes with others, veterinarians suggest fully vaccinating against:

### DISEASE

### WHAT IT IS

#### Distemper

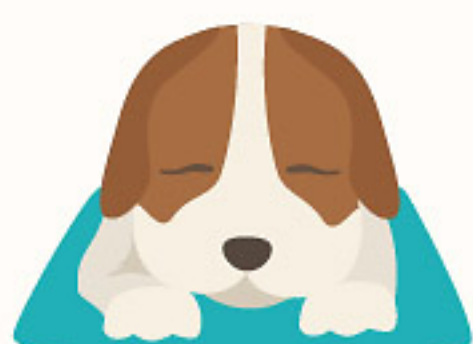

A viral disease that can cause upper respirator infection, intestinal problems, lethargy, and fever

#### Adenovirus

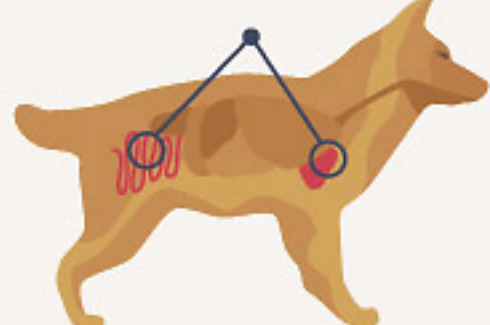

A viral disease that can cause upper respiratory infection, kidney and liver disease, and eye problems

#### Parainfluenza

A viral disease that can cause coughing, sneezing, anorexia, fever, and malaise

#### Parvovirus

A viral disease that can cause intestinal or heart problems

#### Bordetella

A bacterium that can cause kennel cough, an upper respiratory infection

#### Rabies

A viral disease that can cause paralysis and/or severe behavioral changes

## LICENSE

Some municipalities require:

Municipal dog license

Off-leash permit tag
